REMARKS

Claims 1-10 and 44 were pending prior to this Response, claims 11-43 have been cancelled without prejudice, and new claim 44 has been added in the Response filed on May 12, 2003. In the present communication no claims have been amended, added or cancelled. Therefore, claims 1-10 and 44 are pending as presented in the Response.

The Double Patenting Rejection

The Examiner states in the Communication that the Response filed on May 12, 2003 is not fully responsive because Applicant did not respond to a provisional obviousness-type Double Patenting Rejection by arguing the rejection or filing a Terminal Disclaimer (Communication, page 2). To overcome the alleged non-responsiveness to the provisional rejection, Applicant submits herewith a Terminal Disclaimer disclaiming the terminal part of any patent that may be granted based on the present application that would extend beyond the grant of any patent that might be granted on co-pending U.S. Patent application Serial No. 09/790,321, filed February 21, 2001. In addition, Applicant submits that the present application and co-pending U.S. Patent Application Serial No. 09/790,321 referenced in the Terminal Disclaimer were co-owned by Diversa Corporation at the filing date of the present application. In view of the Terminal Disclaimer submitted herewith, Applicant respectfully submits that co-pending U.S. Patent Application Serial No. 09/790,321 is not available as prior art against the present application. According, reconsideration and withdrawal of the Double Patenting Rejection are respectfully requested.
